

Naturally speaking since 1982.

Dragon is used by millions of people to communicate more naturally and to get more done - faster, better and smarter. Here's how it all started.

1982

Dragon Systems founded by Dr Jim Baker and Dr Janet Baker

Developing products centered around their voice recognition prototype, first released for DOS.

1990

Dragon Dictate 30
the first general purpose large vocabulary, speech to text dictation system

5000

5000 Word continuous speech system for PCs

1997

Dragon NaturallySpeaking 1.0

launched the world's first general purpose continuous speech recognition solution for the PC

2006

Nuance introduces Dragon NaturallySpeaking 9

promising accuracy levels up to 99% and for the first time eliminating the need for the user to enroll the software. Dragon NaturallySpeaking Medical version was released soon after along with Dragon NaturallySpeaking Legal version.

2007

Dragon celebrates 10 years

and is now widely recognized to be the best speech recognition solution in the world and its ease of use and accuracy has made it a speech recognition solution that everyone can use. Millions of people across the world benefit from the enormous productivity with converting speech into text at up to 160 words per minute with accuracy levels up to 99% and being available now in English, Dutch, French, German, Italian and Spanish languages.

10

2009

Dragon Dictate for Mac launched

bringing a whole new speech experience to Mac users.

2014

Nuance Unveils Dragon NaturallySpeaking 13

even faster and more accurate and now gives users the option of being able to use their laptops own microphone giving them more options and convenience when setting up.

Dragon Dictate for Mac Version 4

was also launching a new audio file transcription capability which provides the ability to transcribe text from any single speakers pre-recorded audio file combining both voice recognition and transcription offerings into one powerful product.

2015

Nuance announces Dragon Anywhere

a cloud based solution that lets you customize words, boilerplate text or commands to quickly and accurately dictate and edit documents by voice directly on your iOS or Android device. Nuance also introduces new versions of Dragon for the PC and Dragon for the Mac which are for individuals and organizations looking to work smarter and deliver documentation productivity with customization, performance, and security to all your devices.

Today

Dragon is used by millions of people to communicate more naturally and to get more done

- faster, better and smarter.
